

Your PSO Bill

There have been some recent changes to your PSO bill. Here's a few reasons why:

OKLAHOMA
Corporation Commission

The Oklahoma Corporation Commission reviews and approves both parts.

FIXED COST – FUEL-FREE POWER PLAN

NEW FUEL-FREE ENERGY GENERATION that will ultimately lower customers' bills by 2026. PSO customers will have a diversified mix of energy delivered to their homes from clean resources together with natural gas.

TYPICAL RESIDENTIAL MONTHLY CHANGE

(by 2026)

\$ -0.64

VARIABLE COST – FUEL SUPPLY COSTS (Jan. 2024)

The natural gas that powers our generation plants and other energy supplies are "pass-through" costs. This means that PSO customers only pay what PSO paid to keep the generation plants supplying power to your home. Lower natural gas prices and PSO's investment in fuel-free power has led to a substantial savings for customers moving forward.

\$ -15.53

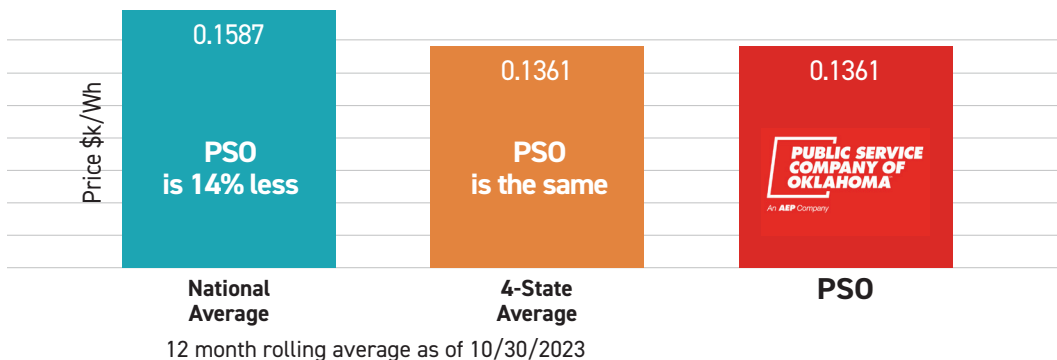

WINTER STORM URI

Putting our customers first meant PSO paid high energy supply costs during the winter weather storm in February 2021 to keep the power flowing to your home.

\$ 4.82

AVERAGE RESIDENTIAL ELECTRIC PRICES (U.S Energy Information Administration)

Price changes can be unsettling. Consider these tips to lower your bill.

SAVE ENERGY. SAVE MONEY.

Use these 10 low-cost tips, to improve your home's comfort while lowering your monthly energy usage.

Check your usage in 15 minute periods at psoklahoma.com/account/usage/

- 

In the summer, set your thermostat a few degrees higher while you're away or asleep. In the winter, set your thermostat a few degrees lower while you're away or asleep.
- 

Close curtains and blinds to keep summer heat out and open them to let in the sun's warmth during the winter.
- 

Close the fireplace damper when not in use to keep air from escaping through the chimney.
- 

Replace traditional bulbs with LEDs. They last longer and use less energy.
- 

Unplug underused electronic devices when not in use.
- 

Turn off lights when you leave a room for longer than 15 minutes.
- 

Only wash full loads of laundry and dishes to conserve water and energy.
- 

Lower your water heater temperature to 120-130 degrees to save 3-5% in energy costs.
- 

Seal around windows and doors to keep air from leaking in or out.
- 

Clean or replace air filters every month or two to keep it running efficiently.
